

Student Worksheet: The Treasure of Boombadaboombaboomshah!

Instructions:

Your task is to locate the treasure of the mystical mysterious, Boombadaboombaboomshah, who is said to have had a treasure so great even his MAMMA was jealous!

This treasure is said to be located somewhere on the Isle of Dreams!!!

Unfortunately, nothing in life is easy (except the easy bits), so you will have to do something to get something.

By locating the treasure of the great Boombada-whatever, you will receive your just reward! What this may be is a mystery; just solve the puzzle first and worry about your reward details later.

There are several parts to your task. By reading these instructions carefully, and following them even more carefully, you will succeed where no-one has ever succeeded before.

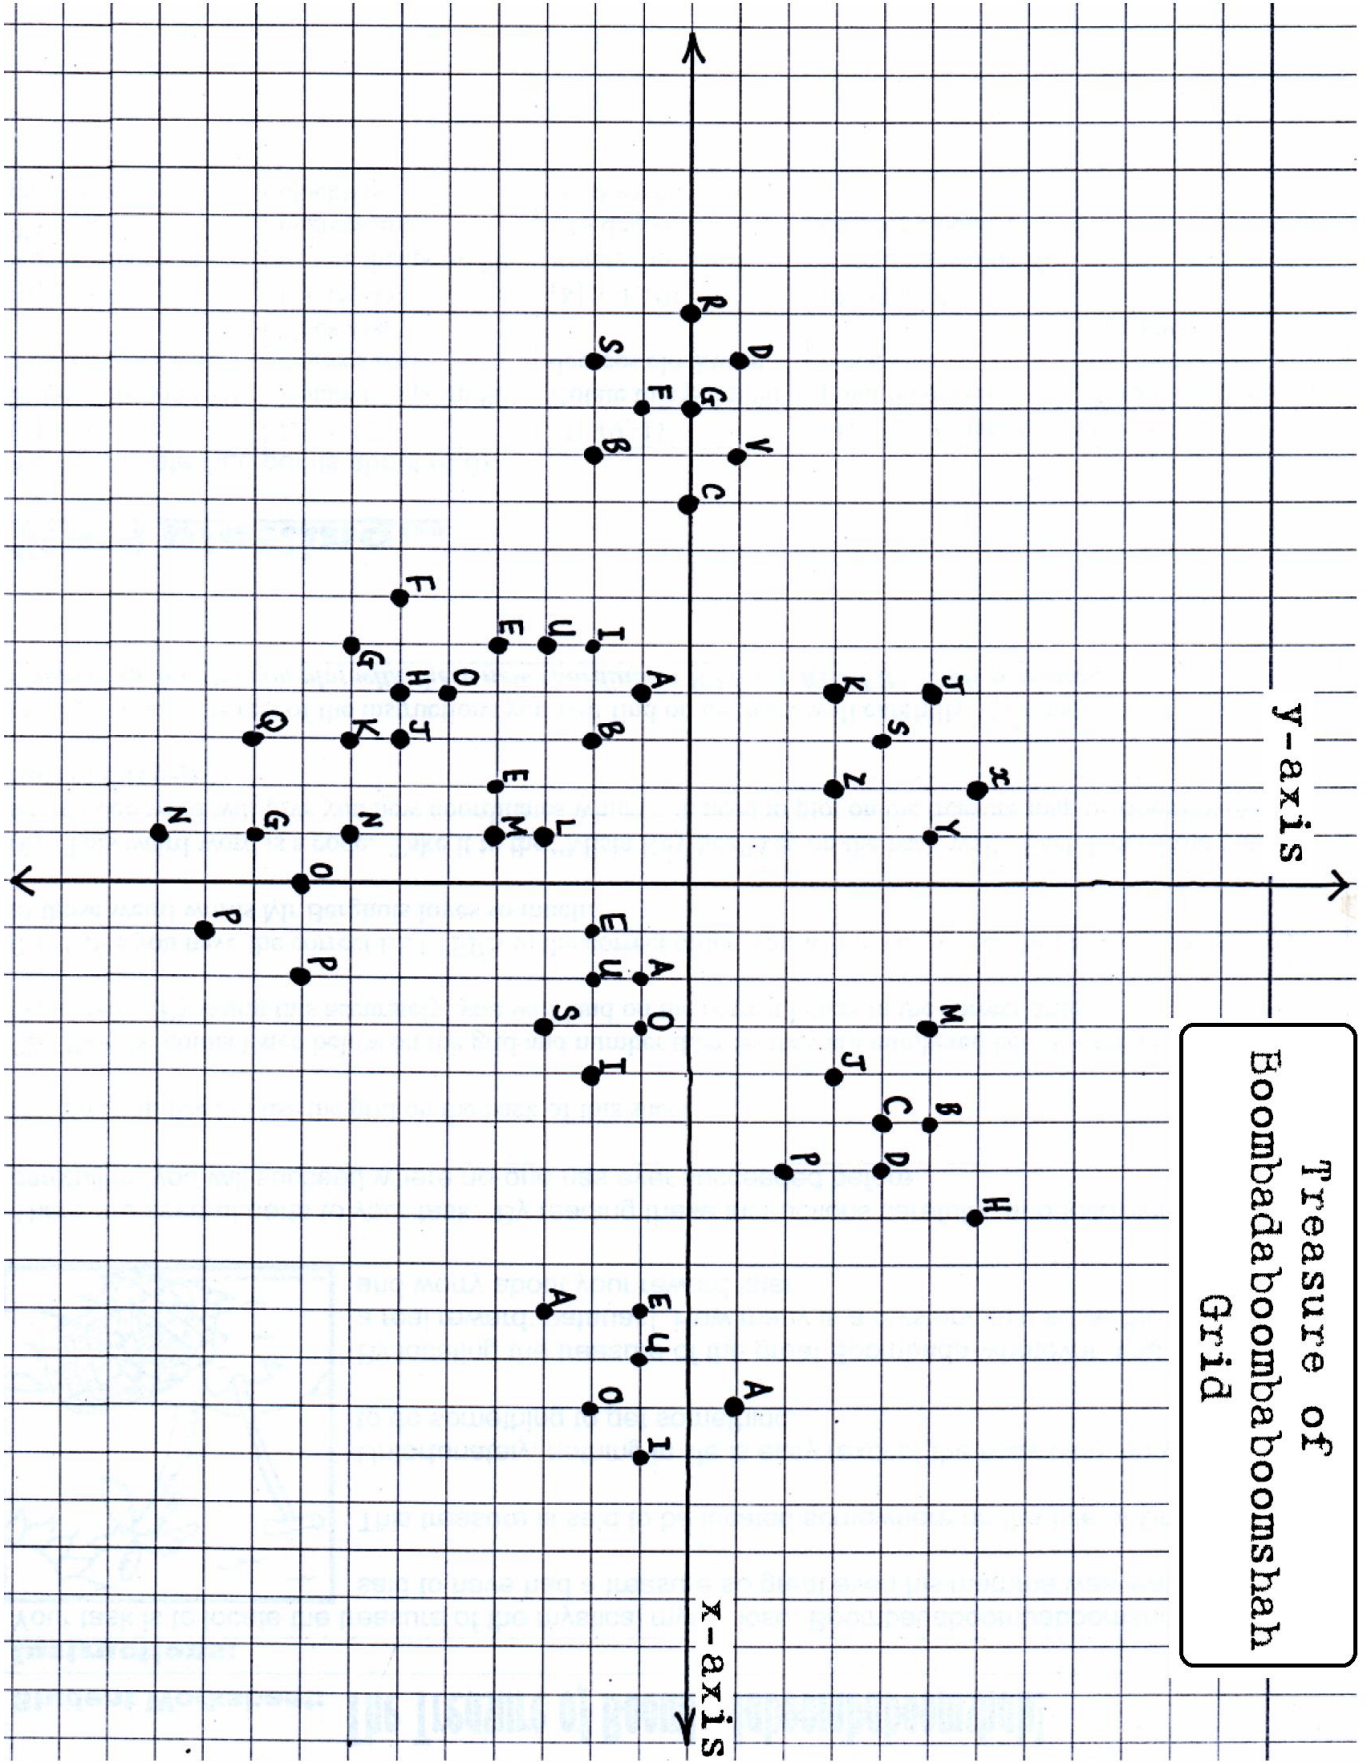

- (1) You need to use the “Treasure of Boombadaboombaboomshah Grid”. Your teacher will give you a copy.
- (2) Plot the points listed below on this grid and number them as they are numbered below – then rotate them as explained. By doing this accurately, you will land on the correct letters in the correct order.
- (3) Once you have the correct LETTERS in the correct order, you will have a word. Not a real word, just one of those weird words your teacher loves so much.
- (4) This weird word is a code. Take it to the “Mista Key Sez” key where your teacher has posted it. Each letter from your weird code word will give you **new coordinates** which you need to plot on the treasure map of the Isle of Dreams.
- (5) Just follow the rest of the instructions you will find on the back wall carefully. One more point, though: **Connect each point you plot with these new coordinates WITH A RULER! This is important!**

Start plotting...

NOTE: Rotate ALL points about (0, 0)

[1] (-5,5) Rotate this point 90 degrees clockwise	[2] (-4,2) Rotate this point 90 degrees anti-clockwise	[3] (9,-1) Rotate this point 90 degrees clockwise	[4] (1,2) Rotate this point 90 degrees clockwise	[5] (4,3) Rotate this point 90 degrees anti-clockwise
[6] (2,-5) Rotate this point 270 degrees anti-clockwise	[7] (5,-4) Rotate this point 270 degrees anti-clockwise	[8] (-1,10) Rotate this point 270 degrees clockwise	[9] (1,10) Rotate this point 90 degrees clockwise
