Now Mista Key Sez...

"Once you have all the coordinates, plot them on the treasure map in the order you found them. Use a ruler to join each of these coordinate points in the order you found them.

"This will result in a long "zig-zaggy" line. This line is the key to locating the treasure, so make sure you do this carefully.

"Once you have drawn the "zig-zaggy" line, you need to ADD together all the individual coordinates (all 18 of them!).

"This will give you a 'release code'. Give this code number to your teacher on a small slip of paper. If you have the correct code number, you will receive the final set of instructions."
