Addition Worksheet (Adding numbers with 4 digits or more)

Questions (show all working)

1) Each jar holds 2343 jellybabies and 8773 peanuts. Give the total number of jellybabies and peanuts.

2) On its journey to nowhere in particular, a rat managed to jump 725797 times, and also glance upwards 4301 times. How many times in total did the rat jump and glance upwards?

3) During a musical show the Clarke family put their hands together to clap 2304 times. The crowd gave their fair share of applause - and many people whistled, too. As a whole, the crowd decided to whistle 6487 times. In total, how many times did the Clarke family clap, and the crowd whistle?

4) A certain fish lays 1917 eggs each year. Now, if a certain tree has an annual yield of 6030 seeds, how many eggs and seeds are there in total?

5) Crazy Raptor has saved 2751 punwallops and 9623 pincillips. Give the total number of punwallops and pincillips.

6) On the far and distant planet of Yuxle there are 746577 males and 5540 females. Give the combined male and female population of Yuxle.

7) A tiny ant has managed to collect 106118 seeds and 6390 blades of straw to help create a cosy and warm place to live - with lots to eat, of course! In total, how many seeds and blades of straw did the ant collect?

8) An enthusiastic reader of historical fiction novels, Xylexia read 2788 pages during her Christmas holiday, and 2300 pages during her Easter holiday. Give the total number of pages Xylexia read over the course of those two holidays.

Addition Worksheet (Adding numbers with 4 digits or more)

Answers

- 1) 11116
- 2) 730098
- 3) 8791
- 4) 7947
- 5) 12374
- 6) 752117
- 7) 112508
- 8) 5088
